AUTHOR INDEX

Bloomfield, V. A., 73
Burkhart, R. D., 85
Chan, R. K. S., 11
Dole, M., 123
Duerksen, J. H., 155
Filson, D. P., 73
Flory, P. J., 69
Fry, C. E., 59
Gornick, F., 131
Hamielec, A. E., 155, 167
Harwood, H. J., 23, 37
Heller, W., 99
Heymach, G. J., 145
Hui, A. W., 167
Jernigan, R. L., 69
Johnston, N. W., 23
Jost, D. E., 145
Kang, H. Y., 123
Kratohvil, J. P., 89
McMullen, D. A., 191
Merrill, J. C., 85
Meyer, V. E., 11
Montgomery, D. R., 59
O'Driscoll, K. F., 47
Piotrowski, H., 23
Price, F. P., 3
Saito, O., 123
Shultz, A. R., 115
Siegel, H., 191
Veal, D. C., 191
Wallace, T. P., 89
Witeczek, J., 99
Yajnik, M., 99

SUBJECT INDEX

Alkanes, linear, dimensions of, 85
Binary and ternary copolymerization behavior, 11
Cooling curves, polymer, 131
Composition–conversion data, relative reactivity ratios from, 59
Configurational distributions, 69
Copolymerization, terpolymerization, and reactions of copolymers and terpolymers, 23
  ternary and binary, 11
Diffusion in liquid solution, 85
Dimensions of linear alkanes, 85
DTA experiment, 131
Finite chain molecules, 69
FORTRAN II program, 37
Free-radical polymerization, 155
Frictional coefficients, translational and rotational, 73
Gel–crosslink relations, 123
Heterodisperse systems of isotropic spheres, 99
Information service, computer-based, (POST), 191
Isotropic spheres, heterodisperse systems of, 99
Latexes, polymer, 89
Light scattering, 89
Light scattering functions, 99
Linear alkanes, dimensions of, 85
Molecular weight distributions, 145, 155
Particle size analysis, 89
Photolysis in a well-stirred solution, 115
Reactor train, steady-state stirred-tank, 155

Relative reactivity ratios, 59
Rotational and translational frictional coefficients, 73
Self-heating effects, 131
Sequence distribution calculations, 37
Shell model calculations, 73
Solution, liquid, diffusion in, 85
well-stirred, photolysis in, 115
Steady-state stirred-tank reactor train, 155
Stereoregular polymers, 3
Stirred-tank reactor train, steady-state, 155
Ternary and binary copolymerization behavior, 11
Terpolymerization, 23
patterns in, 47
Translational and rotational frictional coefficients, 73
Ultrasonic energy, 145
